Test Enzyme Substrate Quantitation 2000 **Date/Time of Analysis** 08/11/2023 11:55

Test Method SM 9223B-QT

Analyte MPN/100mL

E.coli

■ The water sample tested was found to contain LESS than 235 E. coli per 100mL. This water is considered SUITABLE FOR SWIMMING. This test does not indicate if the water sample is suitable for drinking. Drinking raw water such as an untreated lake, pond or stream is not advised. \*\*NOTE: It is recommended that testing of recreational water begin within 6 to 24 hours of collection for optimal results but testing must begin within 30 hours of collection.

## **Units of Measurement and Definitions:**

N/A = Not Available; mL = milliliter; ">" = greater than; "<" = less than; MPN = Most Probable Number; CFU = Colony Forming Unit; TNTC = Too Numerous To Count These results are for a grab sample; collected at one location and at one point in time unless otherwise noted.

State VT

Test results relate only to the samples tested and are representative of the samples as they were received at the laboratory. This is a public record. Information contained in this report may be used for statistical purposes and may be released upon request, pursuant to Vermont Access to Public Documents law (1 V.S.A. 315-320). For guidance and treatment recommendations, please visit www.healthvermont.gov/water-contaminants.

This report shall not be reproduced, except in full, without the written approval of the laboratory.
