II. FINDINGS

Factual Findings

The Minutes of the meeting written by Kari Papelbon are incorporated by reference into this decision. Please refer to these Minutes for a summary of the testimony.

Based on the application, testimony, exhibits, and other evidence, the Development Review Board makes the following findings

1. The applicants seek a permit to modify the septic system allocation for an accessory apartment on Lot 2 of the previously-approved subdivision. The septic system allocation and accessory apartment will be forfeited by Lot 2 and moved to the barn on Lot 1. The subject properties are a ±1.09-acre parcel and a 3.02-acre parcel located at 4 Vermont Farmhouse Road in Underhill, VT (VF004) and 7 Vermont Farmhouse Road in Underhill, VT (VF007).
2. The properties are located in the Residential and Rural Residential zoning districts as defined in §V and §VI respectively of the Underhill Zoning Regulations.
3. Approval is requested for the project pursuant to review under the following sections of the Town of Underhill Subdivision Regulations:
 - General Application Requirements, “Revisions,” page 19
 - Application Submission Requirements, pages 9-11, “Final Plat for Subdivisions”
4. The General Application Requirements, “Revisions” section of the Underhill Subdivision Regulations applies to this application. The section states: “No changes, erasures, modifications, or revisions shall be made on any subdivision plat after final approval, unless said plat is first resubmitted to the [DRB] and the [DRB] approves the modifications.”
5. Application Submission Requirements, “Final Plat for Subdivisions” – The final Subdivision Plat shall consist of one or more sheets of drawings which conform to the following requirements: The final plat shall be drawn to a scale of not more than two hundred (200) feet to the inch, and shall show:

- a. #7 - The location of all of the improvements referred to in Article VIII and in addition thereto the location of all utility poles, sewage disposal systems, and rough grading and other devices and methods of draining the area within the subdivision.
- b. #8 - The location and results of all percolation tests for each lot of the subdivision, the location of all proposed sanitary sewage systems, and a statement that all such systems will be designed and constructed in conformance with the Sewage Ordinance for the Town of Underhill, as well as to applicable state regulations and standards.

III. CONCLUSIONS

Applicable Regulation Standards

Application Submission Requirements, "Final Plat for Subdivisions"

- a. The Board finds that the proposed plan includes the location of the new sewage disposal line connecting Lot 1 with the 1000 gallon pump station on Lot 2. The existing septic system capacity will not change with the revision. No other changes to the subdivision are proposed.
- b. The Board finds that the results of the percolation tests and locations for all septic systems were included on the plans. The Applicants have submitted a copy of their completed Wastewater System and Potable Water Supply Permit Application for the project revision as required by the State of Vermont. The Board recognizes that the Town of Underhill no longer has jurisdiction over septic system permitting.

IV. DECISION

Based upon the findings above, the Development Review Board approves the final application and plat as presented at the hearing subject to the following conditions:

1. Prior to submitting the final Mylars and prior to issuance of a permit for the project, the Applicant shall submit a copy of the Town's application form signed by Joseph Greenough, 7 Vermont Farmhouse Road indicating his assent to the application.
2. Per the Underhill Subdivision Regulations, final approval of the subdivision is granted upon filing of the final subdivision plat in the Underhill Land Records. No transfer or sale of property may occur prior to recording the final plat and all applicable permits in the Town of Underhill Land Records
3. All conditions of the DRB approval dated 10-1-07 for the subdivision remain effective, except as specifically amended herein.
4. The survey plat shall be revised to reflect the new septic easement and allocation for the barn/accessory apartment Lot 1. The revised septic allocations are:
 - a. Lot 1 – existing 3-bedroom house plus a 1-bedroom accessory apartment
 - b. Lot 2 – existing 3-bedroom house
 - c. Lot 3 – existing 3-bedroom house

- d. Lot 4 – existing 3-bedroom house plus a 1-bedroom accessory apartment
- e. Lot 5 – 5 bedrooms (existing structures)
5. All required State and local permits shall be recorded in the Land Records.
6. Prior to recording the final Mylars, the applicant shall submit a copy of the plat and Sheet 1 in digital format. The format of the digital information shall require approval of the Zoning Administrator.
7. At such time the barn is converted into an accessory apartment, a new 911 code shall be required and shall be posted concurrent with the issuance of a zoning permit.
8. All subdivision fees shall be paid in full to the Zoning Administrator prior to filing of the final plat.

Dated at Underhill, Vermont this _____ day of _____, 2011.
