Jumping Worms—What is New?

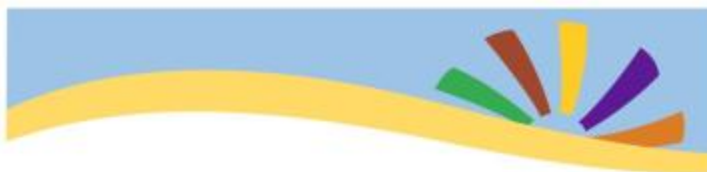

Thursday, March 30, 7:00pm–8:15pm

This presentation by Dr. Josef Gorres will give a brief introduction to the threat that jumping worms pose to our forests, gardens, and no-till agriculture—**why do we care?** The latest research on how to manage them is reviewed, and an outlook is given on this year's research agenda—**what can we do?**

Josef Gorres is a Professor of ecological soil management at the University of Vermont. He is a physicist by training, but his research is in soil science and ecology. He has been studying jumping worms in Vermont for 12 years. Other projects he is involved in are soil erosion and improving restoration of riparian areas with mycorrhizae.

See the Town of Underhill, Vermont home page at www.underhillvt.gov for the webinar link or call Penny M. at (802) 899-2716 for info.

BIRDING OUTING AT CRANE BROOK CONSERVATION DISTRICT IN UNDERHILL VERMONT

Join Rebecca Waterman for a morning bird walk at Crane Brook Conservation District at the end of New Road in Underhill. You'll come away with some new skills on how to recognize birds by sight and by sound, and how to fine-tune your eye for unique bird behaviors. Bring your binoculars. Registration is required as space is limited.

What: Birding Outing—learn to identify birds
by sight and sound.

When : Sunday, May 21, 2023 8 a.m. to 11 a.m.

Where: Crane Brook Conservation District
75 New Road, Underhill

Sign up: Underhill Town Website or click on QR
